Experience

ZT Systems, Austin — *Senior Test Technician*

June 2024 - May 2025

- Supervise and train techs as a Line Lead
- Perform quality control on racks of servers (supercomputers)
- Run tests, troubleshoot failures, execute Python scripts and linux or windows commands, and replace hardware if necessary
- Understand the complete lifecycle of the rack coming in and out of the factory

Jann Software — *Solo Developer*

2018 - CURRENT

- Expert Web and Game Developer
- Created a /projects page on my website that demonstrates all of my projects including how, when, and why I built them
- Extensive knowledge and experience building applications from scratch, using custom frameworks and algorithms if necessary
- Adaptable to new technologies / frameworks
- Experienced with version control, web hosting, and deployment of fullstack web applications using RESTful APIs.
- Developed modern web applications that can use serverless functions or have a full backend and can utilize Open AI's API for intelligent responses.
- Automated my homepage and blog to dynamically react to the device and time

Cloud Payments, Austin — *Junior Software Developer*

June 2024 - Oct 2024

- Researched and implemented offline LLMs like Meta Llama 3
- Made contributions to the git dev branch for the customer portal

Best Buy, Woodland Hills — *Geek Squad Agent*

OCT 2022 - MARCH 2024

- Provided excellent sales, customer service, and solutions
- Solved problems hands-on, with empathy and patience
